

# **PRECISION COATINGS, INC.**

## **Precision GRINDER-Machinist Job Description**

Precision Coatings, Inc., a small and growing, full-service thermal spray coating and Teflon® coating applicator, has a position available for a GRINDER-MACHINIST. We apply specialty industrial coatings and provide machining/grinding services to customers in a variety of industries to enhance part performance.

### **Responsibilities:**

Primary duties are to grind and/or lap various parts to specific size, dimension, and surface finish using center-less, cylindrical, and surface grinders. Diamond grinding experience a plus. **Willing to train on specifics.** CNC skills are a plus, but not required.

Position has opportunity for advancement.

### **Skills:**

**Qualified candidate will have direct work experience in a manufacturing production setting.**

- Ability to read and interpret mechanical drawings/blueprints.
- Setup and operate equipment, and maintain equipment as directed
- Perform inspection activities and complete associated paperwork as required
- Ability to use and read micrometers, caliper, bore micrometer, and surface finish tester, and various other measuring instruments.
- Ability to read and follow written and verbal instructions
- Complete all tasks assigned as shown on travelers and work instructions
- Ability to lift 40 pounds
- Ability to stand for several hours during the day.

### **Experience:**

- 2 year trade school degree or related vocational school training AND 3+ years grinding experience in production environment.
- OR high school diploma AND 5+ years direct experience in a production environment.
- Experience with thermal sprayed coatings a plus.
- Familiarity with ISO 9001 quality practices also a plus.
